BRAIN TEASER
Board Game
IQ PUZZLE

The first part of the document discusses the importance of maintaining accurate records of all transactions. This includes not only sales and purchases but also any transfers between different departments or locations. Proper record-keeping is essential for ensuring the integrity of the financial data and for facilitating audits.

In addition to record-keeping, it is also crucial to establish a clear system of internal controls. This involves defining the roles and responsibilities of each employee and implementing procedures that minimize the risk of errors or fraud. Regular reviews and reconciliations of accounts are also necessary to identify any discrepancies early on.

The second part of the document focuses on the management of cash and credit. It provides guidance on how to handle incoming payments and how to manage accounts receivable. Key strategies include offering discounts for early payment and maintaining a strict policy on credit terms.

Furthermore, the document addresses the issue of budgeting and forecasting. It emphasizes the need to create a realistic budget that takes into account all potential risks and opportunities. Regular monitoring of actual performance against the budget is essential for making informed decisions and adjusting the plan as needed.

Finally, the document concludes with a discussion on the importance of transparency and communication. It encourages management to provide regular updates to the board and stakeholders, ensuring that everyone is kept informed of the company's financial health and strategic direction.

Our largest business segment is on OEM & ODM product development & manufacturing.

We produce toy lines for retail chains, professional toy importer.

Geographically our business covers the US, UK, Germany, Australia, Japan, etc.

Use our expertise in mass producing safe, quality, great-value toys in China to produce your own branded goods!

We are specialists

Carving

A top-down view of a wooden table with various wooden game pieces. In the upper left, there are three white dice with black pips. In the center, a single white die is positioned. To the right, a row of dark blue pawns is visible. In the lower left, a row of light-colored wooden pawns is arranged. In the lower right, two more white dice are scattered. The background shows a wooden king's piece and other pieces, all on a dark wood-grain surface.

SAFETY STANDARDS

We have years of experience making toys in China and will ensure all your toy is produced using materials that adhere to all the latest testing standards for your market.

TOY SAFETY is the practice of ensuring that toys, especially those made for children, are safe, usually through the application of set safety standards. In many countries, commercial toys must be able to pass safety tests in order to be sold.

ASTM

ASTM standards are used around the world to improve product quality, enhance safety, facilitate market access and trade, and build consumer confidence. In US, The ASTM F963 is the standard which toys must meet.

CE

In Europe, the comprehensive legislation addressing toy safety is the Toy Safety Directive of the European Union (EU). These directives are list of requirements toys must comply with. The EN71 Toy Safety Standard is harmonized by these Directives as the default standard which toys must meet. Compliance with directives leads to a CE Mark, which is a mandatory requirement denoting conformity with all applicable directives.

REACH

REACH is a new European Community Regulation on chemicals and their safe use. It deals with the Registration, Evaluation, Authorization and Restriction of Chemical substances. The aim of REACH is to improve the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances.

CARB

The California Air Resources Board is a part of the California Environmental Protection Agency. It is an organization to promote and protect public health, welfare and ecological resources through the effective and efficient reduction of air pollutants while recognizing and considering the effects on the economy of the state.
